## CASEPAKER

Our *casepacker* machine is designed to pack containers such as bottles, cans and all solid product having a cylindrical or cubical shape into cartons at speeds of up to 150 cpm (cases per minute), depending on machine configuration and product specifications.

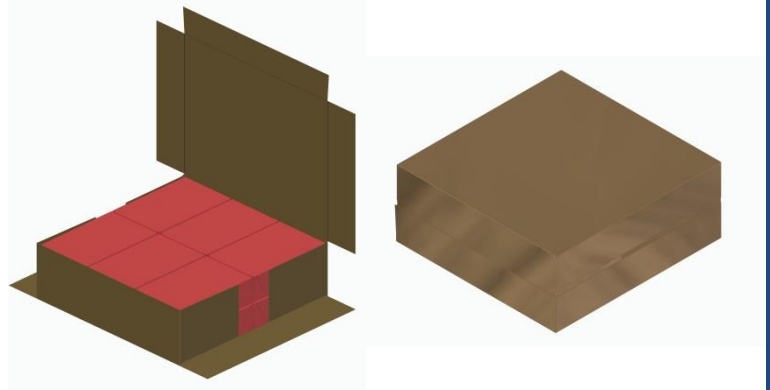

## Product characteristics:

### Product types

- All solid product with cylindrical and cubical shape

### Carton dimensions

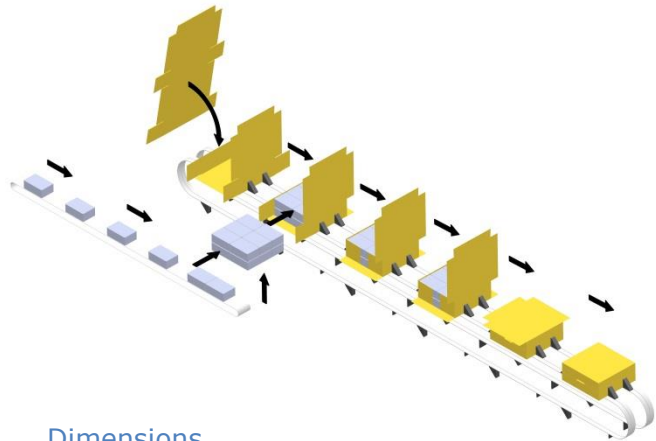

Length	270÷540	mm
Width	250÷500	mm
Height	100÷200	mm

## Technical data:

### Performance

Maximum boxes in feeding	150	min
--------------------------	-----	-----

## Utility specifications

### Electrical Characteristics

Power Consumption	6	kw
Power supply	380	V+N
Frequency	50/60	Hz
Pressure	6	Bar

### Dimensions

Length	3.100	mm
Width	2.200	mm
Height	2.100	mm
Weight	3.000	kg

## Special features:

- Easy to clean mechanical parts
- Aluminum and stainless steel material
- Reduced and simplified maintenance operations
- 15" touch screen panel operator
- Tele assistance gateway included
